

Determination of equivalency for non-regulated health professional applicants to the Master of Health Management Program

Applicants who do not have a regulated health professional designation will be considered if:

1. You have a four year bachelors degree; and
2. a) You have a minimum of 12 months working experience within the healthcare system as a health care professional or;
b) You have a minimum of 12 months experience within the healthcare system with supervisory experience of regulated health professionals.

Additional documentation is required for applicants who are not regulated health professionals who meet the criteria listed above. Applicants must outline their educational and work experience and provide a clear rationale as to how they have prepared you to achieve the following core competencies for the Master of Health Management Program:

- Awareness of the political and healthcare environments
- Organizational behaviour and human resources management
- Financial management
- Research awareness
- Leadership

Evidence of these competencies must be demonstrated in a maximum one page written application using the template below.
